PROFILE SUMMARY

- **Senior Frontend Engineer** with 5 years of experience **building, architecting, and owning** production-grade React and TypeScript applications independently.
- Builds AI-powered real-time applications using conversational UI, Generative AI, WebSockets, and audio/text interactions.
- Experienced in architecting scalable frontend systems with **reusable components, state management**, and maintainable UI architecture.
- Drives frontend quality through testing, accessibility, **performance optimization**, and code reviews.
- **Integrates APIs** and backend services using **REST, Node.js, and Express.js** to deliver features end-to-end.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6), Redux, React Context, HTML5, CSS3, Tailwind CSS

Frontend Engineering: Frontend Architecture, Component Architecture, Reusable Components, State Management, API Integration, Responsive Design, Accessibility, Performance Optimization

AI & Real-Time: Generative AI, Conversational UI, WebSockets, Real-Time Audio/Text Processing

Backend & Database: Node.js, Express.js, REST APIs, GraphQL, MongoDB, Supabase, Microservices

Testing: Jest, React Testing Library, Unit Testing, Postman, SoapUI, Integration Testing

Cloud & Tools: AWS, Git, Bitbucket, Jira, VS Code, Webpack, Jenkins, CI/CD

PROFESSIONAL EXPERIENCE

Deloitte USI

Software Engineer - II

Jan 2025 -- July 2026

Pune, Maharashtra, India

- Led and mentored a team of 4 engineers, owning **frontend architecture** and delivery across 3+ enterprise applications, including **AI-powered** interfaces built with **React, TypeScript, and Generative AI**, improving development consistency and delivery efficiency.
- Architected interactive **data visualization interfaces** enabling users to explore and manipulate complex supply chain relationships involving **50,000+ entities**, implementing **virtualization and lazy loading** to maintain smooth performance at scale.
- Built **AI-powered interfaces** using **Generative AI**, WebSockets, and real-time audio/text processing, enabling multimodal AI interactions and reducing response-handling latency by **25%**.
- Owned frontend architecture for **real-time chat**, building scalable message rendering with **Next.js, TypeScript, and WebSockets**, improving interaction handling by 30%.
- Designed data-fetching and state management architecture using **React Context, Redux, and REST APIs**, reducing redundant network calls and improving perceived load **performance by 40%**.
- Established frontend quality and delivery practices across enterprise applications through **unit testing, accessibility standards, code reviews, CI/CD pipelines, and AWS-based deployments**, improving application reliability and release consistency by 20%.

HTS (Startup)

Software Developer - I

Nov 2023 -- Dec 2024

Pune, Maharashtra, India

- Developed a scalable CRM module using **React, Redux, and JavaScript**, streamlining the lead-to-agreement workflow and reducing **manual effort by 40%**.
- Owned the development of the Parking Selection feature from scratch, designing **reusable React components** and interaction flows that enabled users to efficiently view and reserve available parking spaces.
- Implemented an event log management system with **CRUD operations, filtering, and API integration**, reducing troubleshooting effort by **30%**.
- Enhanced **backend and API capabilities** using **Node.js, Express.js, and Supabase**, optimizing data access and API interactions to **reduce unnecessary API traffic by 40%**.
- Owned event configuration workflows, implementing structured **form management, validation, and state handling to support project setup and administration**.
- Integrated **WhatsApp messaging** through **REST APIs**, enabling automated communication for critical business actions and reducing manual communication workflows.

Wipro Limited

Software Developer

June 2021 -- Nov 2023

Pune, Maharashtra, India

- Optimized user interfaces and document-handling workflows for an internal insurance application, improving operational efficiency and increasing daily policy administration capacity by 30%.
- Developed responsive and reusable UI components using **React and Tailwind CSS**, improving cross-device usability across the Android platform.

- Implemented application-wide **state management** using the **React Context API**, reducing unnecessary re-renders and improving navigation performance by 25%.
- Designed and implemented dynamic forms for new business quotes, policy endorsements, and renewals using reusable **React components**, accelerating feature delivery by 20%.
- Contributed to **Agile development**, debugging, **code reviews**, **CI/CD**, and **clean-code** practices using Jenkins and Git-based development workflows to support reliable releases.

EDUCATION

College of Engineering Pune, India <i>Bachelor of Technology (B.Tech) in IT</i>	July 2018 -- April 2021 CGPA - 7.34/10
---	---

LANGUAGES

- **English** – C1 (Fluent)
- **German** – A1 (Beginner)
